SUMMARY

Full-stack engineer with 1.5+ years of experience building AI-powered applications using LLMs, RAG, and modern web frameworks. Proven track record of delivering production features across React, NestJS, FastAPI, and GraphQL. Strong academic background (CGPA 9.65) with hands-on exposure to end-to-end systems in fast-paced environments.

EXPERIENCE

Trainee Engineer

Jul 2024 – Present

Posit Source Technology

- Built an **AI-powered coding assistant** using LLMs with Monaco Editor and GitHub OAuth for real-time code suggestions and repository analysis; optimized inference with GROQ RAG for faster completions using React, Flask, PostgreSQL, Clerk, Vercel, and Render.
- Developed an **Agreement Generator** leveraging FastAPI, LangChain agents, and LLMs, enabling automated digital agreement generation and signing from predefined templates.
- Created an **AI-based documentation generator** using React and FastAPI with RAG and LLMs, enabling automated, context-aware technical writing with minimal manual input.
- Developed and maintained full-stack features using React, NestJS, and GraphQL, integrating PostgreSQL and BigQuery for efficient data handling across multiple product modules.
- Implemented unit tests using Jest across various front-end modules, improving code reliability and reducing regression issues.

Intern

Jan 2024 – Jun 2024

Posit Source Technology

- Built an **Employee Management System** using React.js, Radix UI, Tailwind CSS, and React Icons, creating a responsive HR interface that improved employee workflows and user experience.
- Managed organizational data with MongoDB and FastAPI, optimizing CRUD operations for records, leave, timesheets, and departments with real-time sync.
- Integrated Clerk Authentication for secure, role-based access (super-admin, admin, member), automating user onboarding and strengthening hierarchy control.
- Added real-time notifications, automated leave workflows, timesheet tracking, and interactive dashboards using Highcharts and Recharts.

PROJECTS

Article Synthesizer | *React.js, Rapid API*

- Built an article synthesizer to streamline article summarization and content generation, enhancing research and content creation workflows.
- Integrated Rapid API for data aggregation, resulting in faster article summarization and improved processing efficiency; achieved significant reduction in user reading time through concise summaries.

Blog App | *React, Tailwind CSS, Cloudflare Workers, Hono, Prisma, PostgreSQL*

- Developed a serverless backend using Cloudflare Workers and Hono for efficient routing with minimal latency.
- Implemented Prisma ORM with PostgreSQL, leveraging Prisma Accelerate for connection pooling.
- Built a responsive frontend with React and Tailwind CSS, deployed seamlessly via Vercel.

SKILLS

Languages: C, Java, Python, HTML, CSS, JavaScript, TypeScript, SQL

Frontend: React.js, Tailwind CSS, Radix UI

Backend: Node.js, NestJS, FastAPI, Flask, GraphQL, REST APIs

AI/ML: LangChain, LLMs, RAG, GROQ, Monaco Editor

Databases: PostgreSQL, MongoDB, BigQuery

Tools & Platforms: Git, GitHub, Clerk, Vercel, Render, Prisma, Jest

EDUCATION

Walchand Institute of Technology <i>B.E. in Computer Science Engineering CGPA: 9.65</i>	Solapur, Maharashtra 2020 – 2024
Sangameshwar College <i>MSBSSHSE Class XII Aggregate: 85%</i>	Solapur, Maharashtra 2019 – 2020
Sevasadan School <i>MSBSSHSE Class X Aggregate: 90.40%</i>	Solapur, Maharashtra 2017 – 2018
